mubilal17@gmail.com · <https://mbilal.app>

I'm a young **software engineer** ready to get my spirit crushed in the workforce. I am extremely flexible when it comes to adopting to new development stacks and have a strong foundation in core concepts of computer science and how they tie in together (i.e. algorithms, operating systems, networks, and databases). My strongest skill is my ability to learn, which is fueled by my enthusiasm in Computer Science and Mathematics!

EXPERIENCE

MAY 2018 – AUGUST 2019

COMPUTER & NETWORK TECH, JKG COMPUTERS

Diagnosed hardware (i.e. RAM, Hard Drive, Overheating), network (i.e. private network configuration, bad signal/interference issues, connection issues between a device & router or router & ISP) and software (missing drivers, software-related crashes, malware, etc) related issues for residential clients.

PROJECTS

WEB PROJECT

NOTES <https://notes.mbilal.app>

- Constructed a front-end single page application using HTML, CSS, Bootstrap, Vue.js, etc.
- Developed a web server using C# and ASP.NET Core.
- Used docker and Heroku to develop a bash script that automatically deploys project onto Heroku.

SKILLS

- C#, Java, JavaScript, C++
- HTML, CSS, Bootstrap
- React.js, Vue.js, Node.js, ASP.NET Core
- SQL, Entity Framework
- Docker, Heroku
- Bash, Cisco IOS
